

OCULUS 22™

WITH ADAPT™ MODULAR TECHNOLOGY

NO FIRST ROUND POP.

The Oculus22™ provides class leading suppression with 2 configurations in one suppressor. Being constructed of 100% Stainless Steel allows more cleaning solutions and unmatched durability.

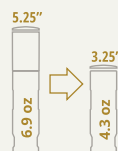

TOP FEATURES

Extreme Durability

With cleaning and durability in mind the entire Oculus22 is machined from 17-4 Stainless Steel barstock. This gives you the ability to use practically any cleaning method with each and every part of the Oculus22.

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

17-4 Stainless Steel Indexed Baffles

Indexing tabs provide repeatable return to zero after user servicing. The Oculus22 uses slotted baffles that create a gas seal to prevent carbon and gas build up between the tube and baffles for ease of disassembly.

No First Round Pop

The Oculus22 features class leading suppression and no first round pop in the standard configuration.

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
