

RADIANT 762™

WITH ADAPT™ MODULAR TECHNOLOGY

LIGHTWEIGHT MODULARITY. LEGENDARY DURABILITY.

The Radiant762 is the pinnacle of lightweight modularity. Combining the use of Cobalt 6 baffles in the main body and grade 5 Titanium baffles in the module means not only is this can lightweight but it also has the durability to be pushed to the limits.

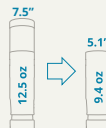

TOP FEATURES

Accuracy Proven

We've sent thousands of rounds through our designs to ensure exactitude. Our vetting process gives our suppressors a proven accuracy and provides you with a repeatable zero shift when attaching/detaching your suppressor.

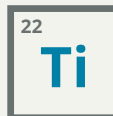

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

Dual Taper Locking System™

Our quick detach mounts feature 2 tapers. The front taper provides a concentric lock up and protects the threads from carbon build up. The rear taper prevents the suppressor from loosening during firing.

Lightweight High Strength Titanium

The Radiant762 is so strong that it is full-auto rated, surpassing US SOCOM standards - while also being magnum rated for calibers up to 300RUM ; with no barrel length restrictions.

UNCONDITIONAL
LIFETIME
WARRANTY

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
