

SURGE 762™

WITH ADAPT™ MODULAR TECHNOLOGY

ONE CAN. TWO LENGTHS.

The Surge762™ - the flagship of modular rifle suppressor technology. A suppressor on your own terms. With the Surge762, you don't have to choose between a short suppressor and a long one. You don't have to pay a tax stamp twice. You don't have to do twice the paperwork, or wait 6 to 8 months (at best) twice. With the Surge762, you get two length configurations with one innovative suppressor. It's your choice.

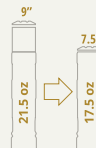

TOP FEATURES

STRATEGIC ENGRAVING

Strategically Placed Engraving

We strategically place the serialized engraving over the thickest Stainless Steel cross section of the suppressor. This allows fast and easy repairs should the suppressor become damaged beyond repair.

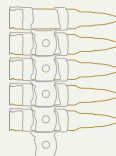

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

Dual Taper Locking System™

Our quick detach mounts feature 2 tapers. The front taper provides a concentric lock up and protects the threads from carbon build up. The rear taper prevents the suppressor from loosening during firing.

Belt Fed Rated®

The Surge762 is machined from top of the line materials to not only last a lifetime, but withstand any rate of fire. The Surge762 is Belt Fed Rated® and rated for calibers up to 300RUM; with no barrel length restrictions. Because we believe your gear shouldn't be what's holding you back.

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
